

Experiment No.11

#Built-in Exception Program

try:

l = [10, 20, 30]

index = int(input("Enter index (0-2): "))

print("Value:", l[index])

except IndexError:

print("Error: Index out of range")

except ValueError:

print("Error: Enter valid number")

finally:

print("Program Ended")

#User-defined Exception Program

class NegativeError(Exception):

pass

try:

num = int(input("Enter a number: "))

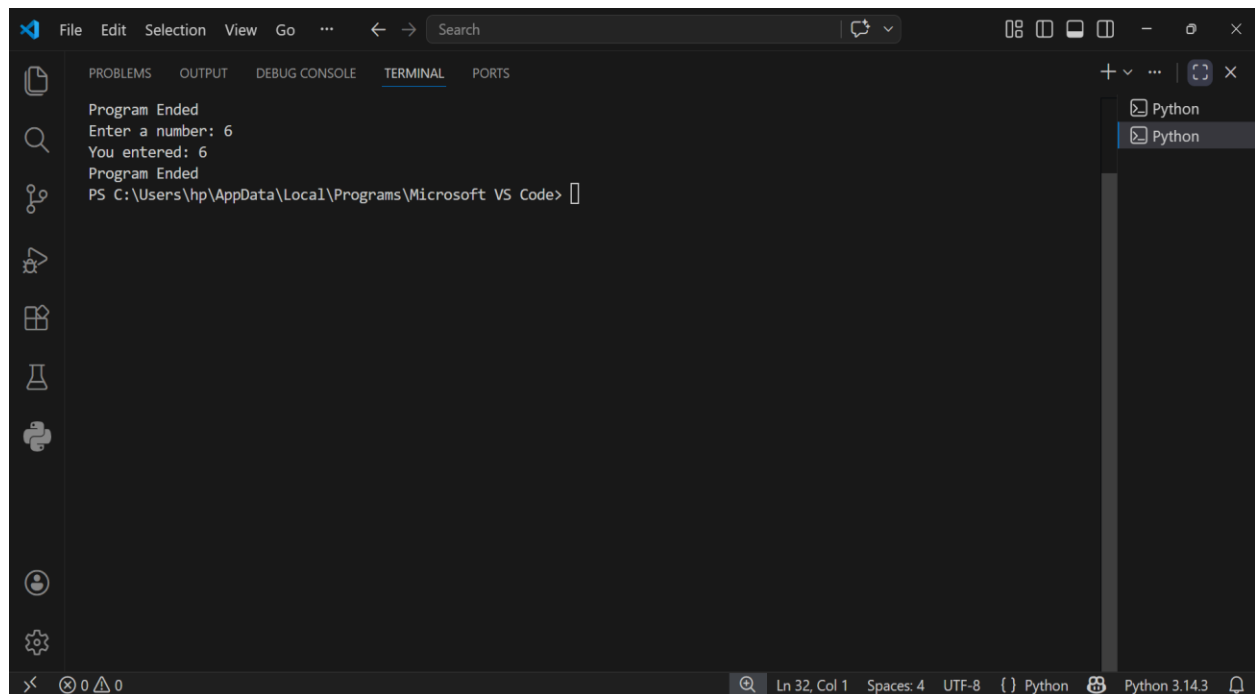

```
if num < 0:
    raise NegativeError

print("You entered:", num)

except NegativeError:
    print("Error: Negative numbers are not allowed")

finally:
    print("Program Ended")
```

Output:

A screenshot of a Microsoft Visual Studio Code (VS Code) terminal window. The terminal is open to the 'TERMINAL' tab, showing the output of a Python program. The output consists of four lines: 'Program Ended', 'Enter a number: 6', 'You entered: 6', and 'Program Ended'. Below the output, the command prompt 'PS C:\Users\hp\AppData\Local\Programs\Microsoft VS Code>' is visible. The VS Code interface includes a sidebar on the left with icons for Explorer, Search, Source Control, Run and Debug, Extensions, Testing, Python, and Settings. The top menu bar shows 'File', 'Edit', 'Selection', 'View', 'Go', and a search bar. The bottom status bar indicates 'Ln 32, Col 1', 'Spaces: 4', 'UTF-8', 'Python', and 'Python 3.14.3'.
