

Experiment No.2

#if statement

a=10

if a>=5:

print("Number is greater than 5")

#if else

a= int(input("Enter a number"))

if a>=0:

print("Number is positive")

else:

print("Number is negative")

#if elif

marks= int(input("Enter your marks"))

if marks>=75:

print("Distinction")

elif marks>=60:

print("First class")

elif marks>=50:

print("Second class")

else:

```
print("Fail")

#switch case

day= int(input("Enter a number"))

match day:

    case 1:

        print("Monday")

    case 2:

        print("Tuesday")

    case 3:

        print("Wednesday")

    case 4:

        print("Thursday")

    case 5:

        print("Friday")

    case 6:

        print("Saturday")

    case 7:

        print("Sunday")

    case _:

        print("Select proper number")
```

Output:

The screenshot shows the Microsoft Visual Studio Code interface with the TERMINAL panel active. The terminal displays the following output:

```
Number is greater than 5
Enter a number10
Number is positive
Enter your marks90
Distinction
Enter a number3
Wednesday
PS C:\Users\hp\AppData\Local\Programs\Microsoft VS Code>
```

The status bar at the bottom indicates the current file is at Line 49, Column 38 (792 characters selected), using UTF-8 encoding with CRLF line endings. The Python extension is installed, and the interpreter is set to Python 3.14.3.
