

Experiment No.4

```
list=[10,20,30,40]
```

```
print(list)
```

```
print(list[0])
```

```
print(list[1])
```

```
list.append(50)
```

```
list.insert(1,10)
```

```
list.remove(10)
```

```
list.pop()
```

```
list.reverse()
```

```
print(list)
```

```
list1=[19,27,38,47,57]
```

```
list1.sort()
```

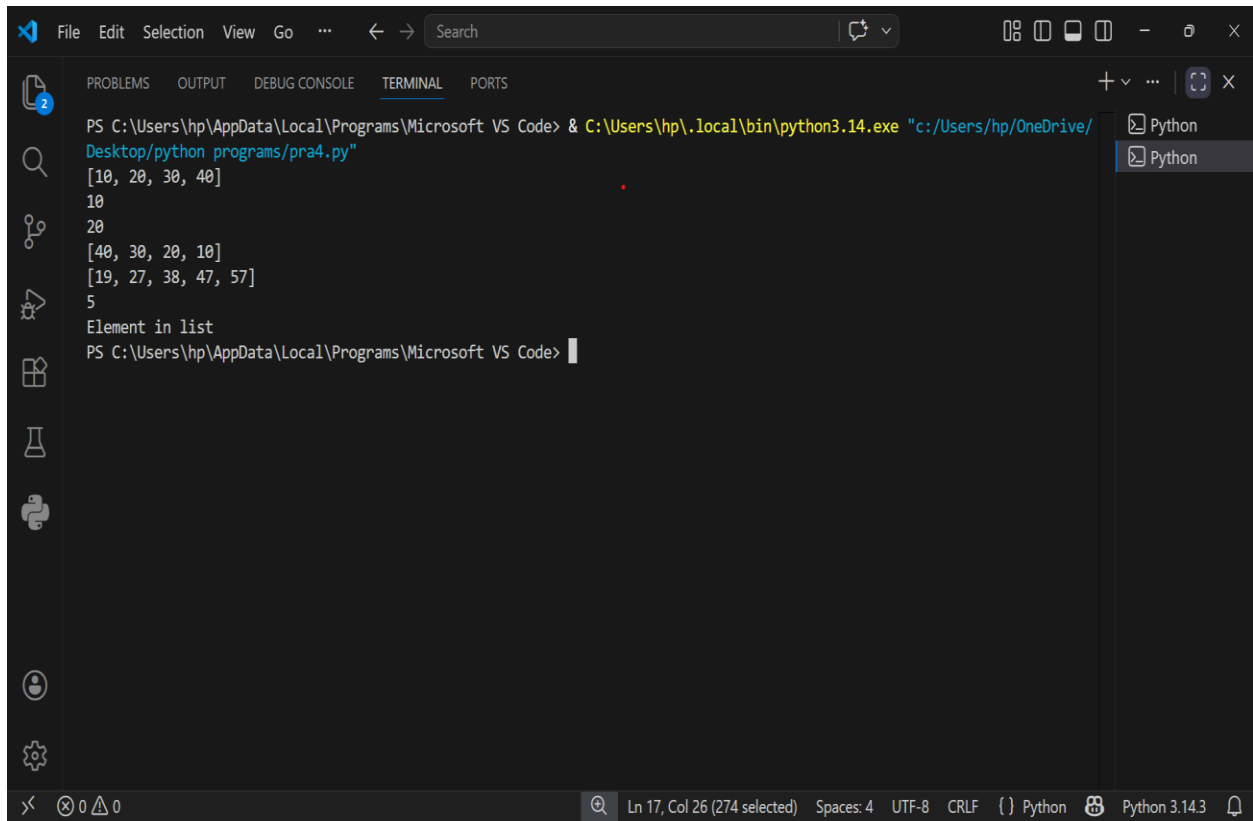

```
print(list1)
```

```
print(len(list1))
```

```
if 19 in list1:
```

```
print("Element in list")
```

Output:

The screenshot shows a Visual Studio Code (VS Code) terminal window. The terminal is running a PowerShell command to execute a Python script. The output of the script is displayed in the terminal. The command prompt shows the current directory and the command used to run the script. The output includes several lines of text, including a list of numbers, a single number, and a message indicating an element is in a list. The terminal window also shows the file explorer on the left and the search bar at the top.
